Dyslexia,

Introduction

As a child I was the victim of Dyslexia (Dyslexia is a learning disorder that involves difficulty reading due to problems identifying speech sounds and learning how they relate to letters and words (also called the reading disability).

Dyslexia is not due to problems with intelligence, hearing or vision. Most children with dyslexia can succeed in school with tutoring or a specialized education program. Emotional Dyslexia is not due to problems with intelligence, hearing or vision. Though there's no cure for dyslexia, early assessment and intervention result in the best outcome. Sometimes dyslexia go undiagnosed for years and isn't recognized until adulthood which was my issue.

Most children with dyslexia can succeed in school with tutoring or a specialized education program. Emotional support also plays an important role. Dyslexia is not due to problems with intelligence, hearing or vision. Most children with dyslexia can succeed in school with tutoring or a specialized education program, for which I had none. Emotional support also plays an important role. Often dyslexia go undiagnosed for years and isn't recognized until adulthood which was my issue. This condition for led to being repeating the 3rd, grade. As a result, of being left backed, I found myself place in class grades 4,5,6,7,8, and 9 with reading issues. In High School I was place in a non-academic program, also with students with other disabilities.

As a result, I was exposed to the most aberrant behavior (setting fire, masturbating in the back of the room, weapons, out of control fighting, and drug use issues. In my mind early on in order to Survive, I just became another class gangster. I was not a good student, and the teachers did not expect much of me, and I did not expect much of myself ether. While in Community College, I was

unable to grasp the college experience. As a result, I was quietly dismissed.

In High School I found my Sweetheart Anna. As an excellent student Anna led me into a world of art, reading, music, and the College experience. She assisted me in my academic career, as a result I was accepted to The City College of new York where I major in Sociology at City College of New York with the help of my sweetheart where I received a B.A, MA, and a Ph.D.). I married my High School sweetheart; we had three children all of whom are Teachers Today(an example of father social background as a factor of Human Capital).

Today I am Professor Emeritus of Sociology from New York City College of Technology (CUNY) with 30 Peer reviewed scholarly articles all centering around Sociology and very day life. Each of the articles referred below are social topics that I encounter as a Dyslexic individual in East New York Brooklyn.

East New York as a young Adult was full of Street gangs, drug users, and Gangsters. In High school the "civil rights busing" issue which created Black and White Gangs, and a war like environment. Below are 32 original Reviewed Article written by an me as an adult who encountered many social issues which I did not I was able to relate to Sociology Theory in 32 reviewed Articles in Sociology.

<p>Durkheim's Sociological Analysis of Suicide S Gerardi <i>Sociology Mind</i> 10 (2), 82-85 This article argued that the high suicide rate according to Durkheim is based in social integration.</p>	2	2020
<p>Underemployment/unemployment and the public placebo of educational failure S Gerardi <i>Sociology</i> 3 (4), 314-316 Description Over the last several decades there has been a series of national economic/trade policies which has had a negative impact on employment, the middle class, organized labor, upward mobility, and the American Dream. This effort suggests that in order to compensate for economic/trade decisions which has led to a tremendous loss of all forms of employment in the USA, the power elite (both economic and political) have used the myth that the American Educational system has failed to educate, hence creating a skill gap and unemployment/underemployment.</p>	2	2013

Social Change, Historical Modes-of-Production and the Tendency toward Capital Concentration S Gerardi Sociology Mind 2 (3), 247-250 This effort suggests that a key component within the conflict paradigm often not referred to in the literature is the Tendency toward Capital Concentration as a function of historical changing economic modes of-production. Furthermore, modes-of-production change is the primary force of social change within the conflict view. This effort will cite several examples of changing economic modes-of-production as the result of Tendency toward Capital Concentration, which has acted as force of social change.	2	2012

The Sociological Analysis of the Psycho-Social Paradox of Social

Anomy and COVID-19 Pandemic Lockdowns

This effort will suggest that the COVID Lockdown Mandates has had a negative dialectical effect on social civil behavior. Indeed, rather than slowing down the advancement of the disease, it created a new social outcome, the paradox of Social Anomie (Durkheim). Social Anomy defined can be seen as the social condition in which there is an absence of the norms and values that were previously found in an orderly civil society.
